This certificate, issued to ROGERSON ATS

certifies that the change in the type design for the following product with the limitations and conditions therefor as specified hereon meets the airworthiness requirements of Part 4b of the Civil Air Regulations. *dated December 31, 1953, Amendments 4b-1 through 4b-11 and SR-422B.*

Original Product — Type Certificate Number: A5EU
Make: BAC 1-11
Model: 401/AK, 410/AQ, 419/EP, 422/EQ, 412A/EB, 414EG

Description of Type Design Change:

Installation of auxiliary fuel tanks in the forward and aft cargo compartments in accordance with FAA sealed Aircraft Tank Service Drawing List Summary No. 2500. FAA approved Aircraft Tank Service Flight Manual Supplement dated August 24, 1973, or later approved revisions, is required as part of this installation and included as part of the ARB approved AFM VS6.4.

Limitations and Conditions: The approval of this change in type design applies basically to BAC 1-11 only. This approval should not be extended to other aircraft of this model on which other previously approved modifications are incorporated unless it is determined by the installer that the interrelationship between this change and any of those other previously approved modifications will introduce no adverse effect upon the airworthiness of that aircraft. This determination should include consideration of significant changes in weight distribution such as an increase in the fixed disposable weight in the fuselage.

This certificate and the supporting data which is the basis for approval shall remain in effect until surrendered, suspended, revoked, or a termination date is otherwise established by the Administrator of the Federal Aviation Administration.
